Subject: UPDATE! San Jacinto River Waste Pits Superfund Site webpage: GBF/HARC comments on draft FS and recommendations for site cleanup
Date: Thursday, July 03, 2014 3:55:19 PM

Dear San Jacinto River/Houston Ship Channel Community Members and Stakeholders-

The Galveston Bay Foundation (GBF) has updated the [San Jacinto River Waste Pits Superfund Site webpage](#):

- We have added the GBF/Houston Advanced Research Center (HARC) June 18th letter to the U.S. EPA providing our comments on the draft Feasibility Study and our recommendations for site cleanup. You can access it at the link at the top of the webpage or in the bullet list in the middle of the page.

PLEASE NOTE: As the Technical Assistance recipient, GBF/HARC provided these comments to the EPA after reviewing the draft Feasibility Study and other documents pertaining to the site. The EPA will announce a proposed cleanup alternative at which time the public will have the opportunity to provide comments during an official 30-day public comment period. That public comment period date is to be determined.

We hope you find this information helpful. We will update the site with new documents as they become available and will provide you notice about any public meetings and the public comment period.

Please share this e-mail with your family, friends, and other members of the community and encourage them to contact me to be added to the mailing list.

Sincerely-

Scott A. Jones
Director of Advocacy
Galveston Bay Foundation
